Introduction to WET

WET Engineering (WET) is a multi-discipline firm serving clients in the public, private, and industrial sectors of the aquatic arena. The engineers at WET bring over thirty years of experience in the aquatic industry, providing expertise in master planning, design, permitting, and construction administration.

As a leader in the industry, WET understands that developing infrastructure in today's market requires a collaborative approach amongst many disciplines to provide the necessary solutions that can be adapted for future growth. Our staff is capable of managing a project from the early planning stage

through design and into construction administration.

Founded on a standard of excellence, our growth and success is based on our commitment to tailor our services to quality design solutions that are cost effective, reliable, and delivered within the agreed upon timeframe.

Waterparks

Our project designs have ranged from single element installations in existing parks, future park expansion planning, and full-scale park developments. As a multi-discipline engineering firm, we can suggest the attraction elements and their layout that will best suit proposed sites and coordinate the design process from inception through permitting and into the construction phase. WET engineers have built solid relationships with virtually every major waterpark component manufacturer. These relationships provide us with the experience necessary to assist our clients in choosing modern waterpark components and infrastructure to meet their budgets and enhance their audiences pleasure. Our firm is a member of the World Waterpark Association (WWA) and International Association of Amusement Parks and Attractions (IAAPA).

Commercial Pools

WET designs pools for a wide range of clients from land developers, health club owners, camps, local municipalities, and the US Military. We are experienced in all stages of pool design from the conceptual stage to final completion.

WET can also develop engineered plans on a pre-determined layout. Our firm is a member in good standing of The Association of Pool and Spa Professionals, The Florida Swimming Pool Association, and

The United Pool and Spa Association, which allows us to stay abreast of all the latest developments in the industry.

Services

- Construction Administration
